- 16-gauge formed steel support structure, and 10-gauge welded, tubular steel, base assembly.
- Packaging for shipment via motor freight.

### COURSE CONTENT

Instructor Resource and set-up reference.

### GENERAL DESCRIPTION

An introductory hands-on teaching aid, designed to supplement courses in belt drive and sheave selection and maintenance. This steel, rack-mounted identification panel accommodates magnetic identification tags relating to the belt samples supplied, allowing association of a tag with the appropriate component by the student.

Eight, industrial-quality belt samples are provided as well as related sheaves. The samples include a variety of v-belt and positive drive belt designs, allowing for identification by the student using applicable magnetic tags.

The silk-screened panel face can be used on any standard 19in. rack, or on the DAC, #945 Sample Panel Support Assembly, which is provided in this package.
