

100A, Single Pole Circuit Breaker Cutaway

Model: 273-907

DAC Worldwide's 100A, Single Pole Circuit Breaker Cutaway (273-907) is a detailed and professionally-crafted circuit breaker cutaway that depicts a common DIN-rail-mounted, single-phase industrial breaker. This common piece of electrical hardware is found in manufacturing facilities, petro-chemical plants, refineries, and other similar industrial and commercial applications.

The cutaway includes a formed-steel mounting baseplate, allowing for stand-alone display, bench-top mounting, or mounting on specialized DAC Worldwide mounting benches and support structures.

Through careful sectioning, in combination with replacement clear side panels, the complete internal configuration of the breaker can be seen. Details shown include contacts, operating mechanism, trip bar, latch springs, and terminal connections.

FEATURES & SPECIFICATIONS

- Sectioning of an actual industrial component (common breaker brands and model numbers are chosen for industrial relevance).
- Removal of both breaker sides and replacement with laser-cut, clear acrylic side panels.
- 13-gauge, formed-steel, powder-coated mounting baseplate with DIN rail segment.
- Provision for mounting on related DAC Worldwide bench, workstation, display, and storage products.
- Packaging for shipment via parcel service or postal service.
