

ACR Steel Ball Valve Cutaway

Model: 373-501

DAC Worldwide's ACR Steel Ball Valve Cutaway (373-501) is a professionally-crafted, sectioned example of a specialty ball valve as used in air conditioning and refrigeration system as a maintenance-related block valve. Often used for positive isolation of air conditioning suction, discharge and liquid lines during maintenance and repair activities, these dependable 1/4-turn valves are frequently encountered.

A full cutaway view of the spherical closure element and seat exposes the complete internal mechanism, including full-port ball, stem, and specialty seals, while retaining its operational characteristics. Cutaway surfaces are enhanced through painting, making the geometry of all components more clear. Multiple cutaways unveil all internal components, which enhances classroom training in HVAC system design, maintenance, troubleshooting, and preventive/predictive maintenance.

The full-size, fully-detailed example gives learners a first-hand view into a component that is found in various applications worldwide. This professionally-crafted, yet-economical component sample will enhance HVAC training activities in both the industrial and the educational setting.

Enhance Training with Hands-On Cutaway Industrial Components

This ACR Steel Ball Valve Cutaway provides a full cutaway view of the compressor body that exposes the complete internal components and operating principles. Economically mounted on a formed-steel and powder-coated modular display panel, this sample panel can be mounted on a variety of optional benchtop display fixtures and storage structures.

The cutaway features carefully-planned cutaway areas that are individually mounted, and possess the ability to be removed from the baseplate for convenient classroom use. All of the cutaway's components are also visible and have been retained, enhancing students' visual learning. This carefully-crafted teaching aid will support instructor-led training and independent student self-discovery in a variety of vocational and academic air conditioning and refrigeration programs.

The equipment used within the cutaway is cleaned, primed and painted using a high-endurance urethane coating, providing durability to stand up to frequent use. In addition, all of the component parts are color coded to enhance the learning process.

Expand Training with Additional HVAC Model Options

The ACR Steel Ball Valve Cutaway is only one of DAC Worldwide's expansive HVAC training cutaways, which includes a Hermetic Scroll Refrigeration Compressor Cutaway (373-130), an Open Drive Refrigeration Compressor Cutaway (373-140), an ACR Solenoid Valve Cutaway (373-502), and more!

FEATURES & SPECIFICATIONS

- Full sectioning of a new name-brand steel ball valve (popular models by well-known manufacturers are chosen for industrial/commercial relevance)
- 13-gauge formed-steel powder-coated mounting panel with provision for convenient mounting on related optional display and storage products
- Customized component support saddles and support straps
- Carefully-planned sectioning exposes all primary features including: stainless ball, ball seat, spindle, spindle seal, cap, cap seal, and ball access connection
- Packaging for shipment via mail service, parcel service, or courier

PRODUCT DIMENSIONS

- **Product Dimensions**
(L x W x H)
10.5" x 9" x 4.5"(265 x 225 x 115 mm)
3.5 lbs. (1.6 kg)
- **Shipping Dimensions**
(L x W x H)
12" x 12" x 12" (300 x 300 x 300 mm)
5 lbs. (2.3 kg)

OPTIONS

- Recommended #373-002 Tabletop Support Frame Assembly
