

# Ball Float Drain Valve Cutaway

Model: 273-430

DAC Worldwide's Ball Float Drain Valve Cutaway (273-430) is a detailed, professionally-crafted specialty valve cutaway that depicts a unique liquid draining-type ball float valve commonly found in conjunction with moisture separators or independently in industrial and commercial compressed air system applications.

Often confused with steam traps, these devices efficiently discharge accumulated liquid condensate and small suspended contaminants from compressed air systems.

The cutaway includes a formed-steel mounting assembly, allowing for stand-alone display, bench-top mounting, or mounting on specialized DAC Worldwide mounting benches and support structures.

Through careful sectioning, the complete internal configuration of the valve can be seen, while also allowing for disassembly for more complete inspection. All primary features have been retained, including float, lever snap valve, and gaskets. Operating modes can be easily demonstrated and explained.

---

## **FEATURES & SPECIFICATIONS**

- Sectioning of actual industrial component (common models by well-known manufacturers are chosen for industrial relevancy).
- Cleaning, priming, and painting using a high-durability polyurethane coating.
- Color coding of component parts, including float and closure device.
- 13-gauge, formed-steel, powder-coated mounting stand with component attachment brackets and steel pipe mounting spools.
- Provision for mounting on related DAC Worldwide bench, workstation, and display products.
- Manufacturer's installation, operation, and maintenance manual.

- Packaging for shipment via courier or parcel service.

## **PRODUCT DIMENSIONS**

- **Product Dimensions**

(L x W x H)

9" x 9" x 10" (230 x 230 x 250 mm)

11 lbs. (5 kg)

- **Shipping Dimensions**

(L x W x H)

12" x 12" x 12" (305 x 305 x 305 mm)

13 lbs. (6 kg)

## **OPTIONS**

- Recommended #902V Mobile Display Stand
