

Differential Pressure Transmitter Cutaway

Model: 273-820

DAC Worldwide's Differential Pressure Transmitter Cutaway (273-820) is a detailed, sectioned, professionally-crafted differential pressure transmitter that is cutaway to display the component's inner workings.

This common piece of pneumatic control hardware is found in manufacturing facilities, petro-chemical plants, refineries, and other similar industrial, commercial, and oil and gas applications. The cutaway includes a formed-steel mounting assembly, allowing for stand-alone display, bench-top mounting, or mounting on specialized DAC Worldwide mounting benches and support structures.

Through careful sectioning, the complete internal configuration of the device can be seen, while also allowing for disassembly for more complete inspection. All primary features have been retained and showcased.

FEATURES & SPECIFICATIONS

- Sectioning of actual industrial component (common US industrial component brands and models are chosen for industrial training relevancy)
- Restoration and cleaning of all primary component parts where necessary
- Multiple sectioned (cut away) areas showcasing primary components
- 14-gauge, formed-steel, powder-coated mounting baseplate/stand
- Provision for mounting on related DAC Worldwide bench, workstation, and storage products

- Packaging for shipment via parcel service or motor freight
