

Downsized Y-Type Globe Valve Cutaway

Model: 262D

DAC Worldwide's Downsized Y-Type Globe Valve Cutaway (262D) is a realistic, yet economical valve sample that allows for convenient classroom training in the operation, construction, and maintenance of a Y-type globe valve. This type of valve is often used for throttling service in industrial process systems.

Through carefully-planned sectioning and color-coding, the complete internal configuration of the valve is exposed and showcased. Seal features and hardware locations have been retained, allowing for "hands-on" training in maintenance.
