

In-Line Multiple-Reduction Helical Gear Reducer Cutaway

Model: 205-255

Gear reducers, also known as gear boxes, gear drives, or speed reducers, are enclosed mechanical devices that use gears to lower the speed and raise the torque of an electric motor. There are a wide variety of different types of gear reducers for specific applications.

In-line helical gear reducers have a unique set of benefits. They're useful in higher horsepower applications where long-term efficiency is more important than initial costs, which can be higher for this type of gear reducer (although in-line reducers are less expensive than parallel shaft reducers). In addition to being highly efficient, in-line helical gear reducers are capable of handling higher overhung loads.

Many different industries use in-line helical gear reducers, including: chemicals, pharmaceuticals, packaging, food processing, plastic, paper, rubber, steel, mining, and power plants. Specific applications include: conveyors, agitators, crushers, elevators, cranes, mixers, kneaders, thickeners, aerators, plastic extruders, coal pulverizing mills, and larger ball mills.

DAC Worldwide's In-Line Multiple-Reduction Helical Gear Reducer Cutaway (205-255) is one of an extensive series of actual industrial gear reducer cutaways for use in hands-on mechanical drives training in either the classroom or the laboratory.

Each cutaway consists of a real piece of industrial equipment that has been cleaned, restored, repainted, and mounted on a modular, heavy-gauge, formed-steel baseplate. It can also be mounted on a compatible DAC Worldwide bench, workstation, or storage product. All primary functional features are retained, and replacement hardware is provided where necessary.

Industry-Standard Components Provide Realistic, Hands-On Training

Technical training is most effective when learners can gain hands-on practice with industry-standard components they'll encounter on the job. The In-Line Multiple-Reduction Helical Gear Reducer Cutaway features a carefully-restored, sectioned, industrial in-line multiple-reduction helical gear reducer to provide learners with a realistic training experience that will build skills that translate easily to the workplace.

The In-Line Multiple-Reduction Helical Gear Reducer Cutaway is a sturdy unit mounted on a 7-gauge, formed-steel

baseplate with provision for bench-top, workstation, or storage rack mounting. Where necessary, it has been painted with a highly-durable urethane coating. An applicable installation and maintenance manual from the original manufacturer is also included with each cutaway.

Expand Training Capabilities with Custom Options

The In-Line Multiple-Reduction Helical Gear Reducer Cutaway can be customized with available options to create a training system that matches a particular industry's or user's specific needs. For example, available options for this cutaway include: an IPT Industrial Trades Training Manual or Handbook and an Electromechanical Workstation.

FEATURES & SPECIFICATIONS

- 7-gauge, formed-steel baseplate with provision for bench-top, workstation, and storage rack mounting.
- Sectioning and restoration of actual industrial gear reducer. (Popular models by well-known manufacturers are chosen for industrial relevancy.)
- Powder-coding of interior surfaces.
- Painting, where necessary, using a high-durability, urethane coating.
- Replacement hardware where necessary.
- Applicable installation and maintenance manual from original manufacturer.
- Simulated motion via hand crank.
- Packaging for shipment via motor freight or parcel service.

PRODUCT DIMENSIONS

- **Product Dimensions**
(L x W x H) 13.5" x 18" x 11" (343 x 450 x 280 mm)
30 lbs. (13.5 kg)
- **Shipping Dimensions**
(L x W x H) 15" x 25" x 24" (381 x 635 x 610 mm)
55 lbs. (25 kg)

OPTIONS

- Recommended #902 - Electromechanical Workstation
