

# Compressor Inlet Unloader Valve Replica

Model: 211-003

DAC Worldwide's Compressor Inlet Unloader Valve Replica (211-003) is a plastic facsimile of an inlet unloader valve commonly found on positive displacement compressors. This sample is based on a standard valve used in Ingersoll-Rand, XLE compressors, and is typical of inlet valves from a variety of manufacturers. Cast in urethane from an actual valve, this lightweight replica is an exact duplicate of the real hardware used in industry. Related reed valve components are fabricated using brass shim stock.

---

## **FEATURES & SPECIFICATIONS**

- Full-size, to-scale replica
- Cast urethane parts, using molds created from actual equipment
- New, replacement assembly hardware
- Fully-detailed valve including stop plate, valve springs, valve channels, valve guides and seat plate

## **PRODUCT DIMENSIONS**

*DISCLAIMER: Product Dimensions are approximate. Shipping Dimensions and Weights are for directional use only and may change based on manufacturer variables. For the most accurate Shipping Dimensions and Weights, please contact the manufacturer.*

- 4-in. L x 4-in. W x 6-in. H (100 x 100 x 150 mm)
- 2 lbs. (1 kg)

## **OPTIONS**

- Recommended #902F - Electromechanical Workstation
