

# Pneumatic Level Switch Cutaway, Oilfield-Type

Model: 295-722

DAC Worldwide's Pneumatic Level Switch Cutaway, Oilfield-Type (295-722) is a realistic, sectioned example of a common industrial level switch, as used in oilfield production applications and other process systems.

The full internal configuration including displacer and torque tube is showcased through a carefully designed cutaway. Typically these robust switches pneumatically operate safety shutdown systems in oil & gas applications on separators and heater-treaters. A modular baseplate allows for convenient mounting on specialized optional, display, storage, and bench products.

The complete working mechanism, including bellows, contact blocks, pressure and differential pressure adjustment mechanisms, trip mechanisms, and terminal points, can be clearly seen.

---

## **FEATURES & SPECIFICATIONS**

- Carefully-chosen hardware samples from industry leaders such as Fisher, Wellmark, Norriseal, and others, are provided
- 13-Gauge formed-steel baseplate with provision for mounting on related display and storage products
- Cleaning, priming and painting using a high-durability urethane coating, when necessary
- Replacement, plated hardware, where necessary
- Allows for complete dissection for in-depth, hands-on, study
- Steel pipe mounting stanchion, allowing for convenient removal of sample, for closer examination

## **PRODUCT DIMENSIONS**

- 9-in. L x 14-in. W x 15-in. H (228 x 355 x 381 mm)
- 7 lbs (3 kg)

## **OPTIONS** Recommended 902V Mobile Display Stand
