

# Pressure Gauge Cutaway, Low Pressure

Model: 273-270

DAC Worldwide's Pressure Gauge Cutaway, Low Pressure (273-270) is a professionally-crafted, sectioned, industrial-quality pressure gauge that supports training relating to pressure measurement and gauge calibration in related process training applications.

Bourdon tube-type pressure gauges are used widely within industrial liquid and gas processes to monitor and document system pressures. Due to inaccuracies when applied to low-pressure and differential pressure applications, diaphragm-type pressure gauges are chosen for their sensitivity and reliability.

A commonly-encountered, large, high-quality gauge from a well-known manufacturer is chosen for industrial training relevancy and maximum visibility.

A strategically-selected viewing area is cut away, providing full view of the primary rotary geared movement and the diaphragm with clamping flanges.

---

## **FEATURES & SPECIFICATIONS**

- Sectioning of an actual industrial-grade 4.5"-diameter, 1/4" NPT pressure gauge (commonly-encountered brands and models from US manufacturers are chosen for industrial relevance).
- Carefully-considered, offset 90-degree cutaway, unveiling full internal mechanism and enclosure features.
- 14-gauge, formed-steel, powder-coated mounting stand with formed-steel component attachment brackets.
- Provision for mounting on related DAC Worldwide bench, workstation, display, and storage products.
- Packaging for shipment via parcel service or courier service.

## **PRODUCT DIMENSIONS**

- **Product Dimensions**  
(L x W x H)  
9" x 9" x 9" (230 x 230 x 230 mm)

- **Shipping Dimensions**

(L x W x H)

12" x 12" x 12" (305 x 305 x 305 mm)

## **OPTIONS**

- Recommended #902V Mobile Display Stand
- #920F - Display/Support Assembly

### **Address**

DAC Worldwide  
3 Killdeer Court, Suite #301  
Swedesboro, NJ 08085
