

Saunders Sanitary Diaphragm Valve Cutaway, Stainless

Model: 264SS

DAC Worldwide's Saunders Sanitary Diaphragm Valve Cutaway, Stainless (264SS) is a realistic, yet economical valve sample that allows for convenient classroom training in the operation, construction, and maintenance of an industrial diaphragm valve, sometimes referred to as a Saunders valve.

In this case a stainless, sanitary service valve is showcased. Through carefully-planned sectioning, the complete internal configuration of the valve is exposed and showcased. Seal features and hardware locations have been retained, allowing for "hands-on" training in maintenance.

The cutaway is mounted on a 13-gauge, formed-steel, powder-coated support assembly. It can also be mounted on related DAC Worldwide display and storage products.

FEATURES & SPECIFICATIONS

Important Product Note: Photographs are representative and for reference only. Product appearance and dimensions may vary based upon component manufacturer and availability. Any product dimensions given, such as size and weight, are approximate and for directional use only. For the most accurate shipping dimensions and weights, please contact the manufacturer.

- Sectioning of actual hardware (common 1/2" - 3/4" stainless, sanitary-type sample valve makes and models chosen for industrial relevancy).
- Ladish tri-clover-type pipe nipples and clamps are used for valve mounting.
- Replacement stainless hardware where necessary.
- All gaskets, seals, and seats shown.
- 13-gauge, formed-steel, powder-coated support assembly, allowing for mounting on related DAC Worldwide display and storage products.
- Packaging for shipment via courier or parcel service.
