

Saunders Sanitary Diaphragm Valve Cutaway, Stainless

Model: 264SS

DAC Worldwide's Saunders Sanitary Diaphragm Valve Cutaway, Stainless (264SS) is a realistic, yet economical valve sample that allows for convenient classroom training in the operation, construction, and maintenance of an industrial diaphragm valve, sometimes referred to as a Saunders valve.

In this case a stainless, sanitary service valve is showcased. Through carefully-planned sectioning, the complete internal configuration of the valve is exposed and showcased. Seal features and hardware locations have been retained, allowing for "hands-on" training in maintenance.

The cutaway is mounted on a 13-gauge, formed-steel, powder-coated support assembly. It can also be mounted on related DAC Worldwide display and storage products.

FEATURES & SPECIFICATIONS

- Sectioning of actual hardware (common 1/2" - 3/4" stainless, sanitary-type sample valve makes and models chosen for industrial relevancy).
- Ladish tri-clover-type pipe nipples and clamps are used for valve mounting.
- Replacement stainless hardware where necessary.
- All gaskets, seals, and seats shown.
- 13-gauge, formed-steel, powder-coated support assembly, allowing for mounting on related DAC Worldwide display and storage products.
- Packaging for shipment via courier or parcel service.
