

Shell and Tube Heat Exchanger Cutaway

Model: 273-610

DAC Worldwide's Shell and Tube Heat Exchanger Cutaway (273-610) is a desktop, detailed cutaway of an industrial shell and tube heat exchanger. The cutaway supports operations and skills training relating to this common device found in process systems of all types.

Multiple cutaways unveil primary details and features, including tube layout, tubesheet, baffles, nozzles, flowpath, and gaskets.

Mounted on a powder-coated, formed-steel mounting stand, the cutaway can also be mounted on standard DAC Worldwide display and storage products. This heavy-duty cutaway will provide years of use in any industrial training program.

FEATURES & SPECIFICATIONS

- Actual industrial heat exchanger/cooler (common makes and models chosen for industrial relevancy).
- Multiple shell and head cutaways.
- 13-gauge, formed-steel mounting assembly facilitates convenient viewing.
- Mounts easily on DAC Worldwide display assemblies and storage racks.
- High-durability urethane and powder-coated surfaces throughout.
- Packaging for shipment via parcel service.
