

Submersible Vertical Turbine Pump Dissectible

Model: 275-125

DAC Worldwide's Submersible Vertical Turbine Pump Dissectible (275-125) is an actual industrial pump for use in classroom and laboratory training relating to process pumps.

This dissectible has been restored, repainted, and mounted on a 7-gauge, formed-steel baseplate. It can also be mounted on related DAC Worldwide bench, workstation, and storage products. All features have been retained and replacement hardware provided where necessary.

The dissectible features a wet leg demonstration tube fabricated from clear PVC pipe and a 1/4 HP centrifugal pump with inlet strainer. In addition, it comes with an applicable installation and maintenance manual from original manufacturer.

FEATURES & SPECIFICATIONS

- 7-gauge, formed-steel baseplate with provision for bench-top, workstation and storage rack mounting.
- Restoration of actual industrial pump.
- Painting, where necessary, using a high-durability urethane coating.
